The meeting was held according to project timeline agenda and aimed to provide comprehensive project documentation about the work carried on during the project and to plan regarding the next work package.

25.05.2021

The meeting started on 25.05.2021 with the speeches of Ayla Yava and Ümit Mutlu TİRYAKİ as representatives of the host partner institutions. After the welcome ceremony, Mehmet Ali Çıkımoğlu presented Overview of Institutional Health Practices of Gaziantep and its districts. He gave information about the health institutions and their capacity in Gaziantep. He presented detailed statistical information on the situation of immigrants living in Gaziantep and their use of health services. He answered the questions and exchanged detailed information about the work of the Gaziantep Provincial Health Directorate in terms of nursing services

Approach to Transcultural Nursing in Gaziantep Surrounding Provinces: The Case of Hatay, Turkey

Hatay province is very important in terms of receiving a large number of immigrants on the Syrian border. Our colleague Haydar Çevik, whom we invited from Hatay; he evaluated the nursing services in Hatay in terms of transcultural nursing and drew a profile for our partners

from a city on the Syrian border in Turkey. In the presentation, which was watched with interest by all partners at the meeting, the difficulties of immigrants in accessing health services and the difficulties experienced by nurses while giving care were discussed.

Approach to Transcultural Nursing in Migrant Health Centers, Malatya

Our colleague Didem Yıldırım from our Malatya made a detailed presentation about the services provided in migrant health centers in Malatya, the services supported by the European Union, the most common health problems experienced by migrants and the work of nurses in this region. In addition, the education needs of not only nurses but also other health personnel were evaluated. The questions of the partners were answered and it was discussed on which subjects the nurses needed training. The difficulties experienced by nurses were discussed.

Transcultural Nursing Education: The Case of Giresun University

Our colleagues from Giresun University presented about their university, education and student profile. Also they presented transcultural nursing education and gaps in the curriculum. Questions from other partners were answered and various new ideas were developed on the newly developed curriculum on transcultural nursing skills.

Review of the BENEFITS Intensive Training Program

It was discussed on how to realize student mobility due to the pandemic. In addition, a draft program on intensive training program was created considering the experiences of all partners and the educational needs of the students. Task distribution was made to the team that will work on it.

Discussions and suggestions about meeting

Finally, the things to be done and the tasks are summarized. The 1st day of the meeting was evaluated.

26.05.2021

On the second day of the meeting, Gaziantep Cengiz Gökçek Obstetrics and Pediatrics Hospital (Emergency, Outpatient Clinic, suitable clinics to see) where immigrants receive intensive service in the health organizations affiliated to Gaziantep provincial health directorate. Interviews were held with nurses. Interviews were held about the difficulties they experienced

and the needs of migrant patients. The hospital management gave a briefing on the treatment and care services provided to the patients. The partners who participated as in-person had the opportunity to make this visit face-to-face. Partners participating online made this visit virtually with the session opened via the Zoom application and were able to ask their questions.

Briefing Gaziantep Immigrant Health Center

After the hospital visit, one of the migrant health centers supported by the European Union was visited and a briefing on the health services there was presented. Our partners, who can attend face to face, made the visit in person. In addition, with the Zoom application, our partners were able to visit the immigrant health center virtually. At the migrant health center, both Turkish and Syrian nurses were working as a multicultural team. In addition, Surian and Turkish doctors, psychologists and midwives were other members of the health workers. Transcultural nursing care and skills, which is the subject of the BENEFITS project, clearly revealed the need and gaps in the immigrant health center. This visit contributed a lot to the curriculum created by the project partners. The importance of cultural safety and multicultural working environment in health institutions was also understood.

Discussions and suggestions about meeting

The topics planned for the curriculum developed for nursing students at the end of the meeting were reviewed. Evaluation of the meeting was made and the distribution of tasks on the next business plan was made. The meeting was ended.
